Physiology I 3 credits This course is a study of general and specific human structural anatomy and physiology including the requisite principles of chemistry that influence homeostasis. The systems approach is used, incorporating structure and function from the cell to the entire body. BSC 2085 HUMAN ANATOMY AND PHYSIOLOGY I COURSE POLICIES ... Developed with best practices in applied learning theory, this course offers an active learning experience for any student in the form of pre-tests, ample practice opportunities, 3D interactive images, walkthrough videos, and other special tools and applications that will increase your comprehension of anatomy and physiology. Anatomy & Physiology I & II — Open & Free - OLI Course Description BIOL 2404 INTRODUCTION TO ANATOMY AND PHYSIOLOGY (4-3-3). Introduction to the structure and function of the human body with an emphasis on anatomy. Designed for students in the ACC health science programs. Prerequisites: This course has both skill and course prerequisites. Syllabus - Introduction to Anatomy and Physiology Human Anatomy and Physiology Gain a greater appreciation and understanding of the complexity of the human body. This course provides in-depth knowledge of the principles of genetics, how the body's systems work together, and how the human body fights off diseases. 6 Weeks Access / 24 Course Hrs Human Anatomy and Physiology | University of Cincinnati This introductory anatomy and physiology course explores how body systems interact as part of the amazing human machine. We'll examine instructions for life in DNA while investigating the anatomical characteristics and physiological mechanisms that keep us healthy. We will also consider homeostatic

imbalances associated with disease. Sample Syllabus - Anatomy and Physiology: Form, Function ... Course Description: Human Anatomy and Physiology explores the inner workings of the human body and focuses on anatomical and medical terminology. This course is the perfect foundation for students wanting to expand their vocabularies and learn about the body and its levels of organization, as well as the cooperation required between those levels. High School Human Anatomy and Physiology Curriculum The student will become familiar with the anatomy and physiology of the human respiratory system and explain the activities involved in a single respiratory cycle. The student will be able to successfully explain acid-base, electrolytes and fluid balance problems. The student will learn the anatomy and physiology of the urinary system.
